PANEL DISCUSSIONS - DAY 1

GIG ECONOMY: UNRAVELLING THE AYES AND NAYS

The 'gig' or 'shared' economy has become a trend globally and this is characterized by temporary positions and on demand contracts with independent workers

DEEPENING DATA CHASM: BANKED AMIDST SECURITY AND SERVICE

While the industry is trying to create a balance between security and services, it has resulted in data chasm which is leading the businesses to rethink their data strategies

PANEL DISCUSSIONS – DAY 2

IOT LABYRINTH: GRADUATING FROM ADOPTION TO VALUE CREATION

A decade dedicated to IoT development, the industry has just begun to gain momentum, it becomes necessary to understand the new synergies and its full-scale implementation.

CHANGING TELECOM CONTOURS: SUSTAINING GROWTH WITH CONVERGENCE

Convergence offers massive opportunities for the development of new services for the expansion of market, convenience and efficiency.
